

THE LIGHTHOUSE PROJECT

The Lighthouse Project involves early risk screening, appropriate triage and potentially listing on the Evatt list.

Risk Screening

Parties are sent a link to an online tool when they file for parenting orders. That tool screens for risk, including mental health, family violence, and perpetrator behaviours. The results of this screening process are confidential.

Triage

Depending on the level of risk indicated by the tool, the Court will determine case management and triage moving forward.

The Evatt List

If required, a high risk matter will be assessed by an Evatt registrar to determine whether it goes onto the Evatt list.

Specific procedures

If placed on the Evatt list, documents will be automatically requested by the Evatt registrar from the relevant department of child protection and from police.

An independent children's lawyer will be automatically appointed
